

SAVE ON PROTEIN ELECTROPHORESIS

TurboMix™ Gel Casting Benefits

- Save time:** premixed and ready-to-pour acrylamide buffer solutions reduce hands-on prep time

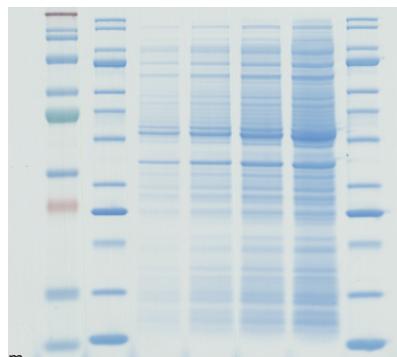

Rapid gel pouring protocol: Quick Cast protocol allows simultaneous polymerization of resolving and stacking gels

Improved resolution: neutral pH running conditions result in reduced protein modification and sharper bands, compared to standard Tris-glycine gels

Flexibility: easily dilute to any required percentage acrylamide gel between 8% and 15%, to separate proteins 6 kDa–400 kDa in size

Faster runs: electrophoresis in as little as 20 minutes – less time than equivalent tris-glycine gels

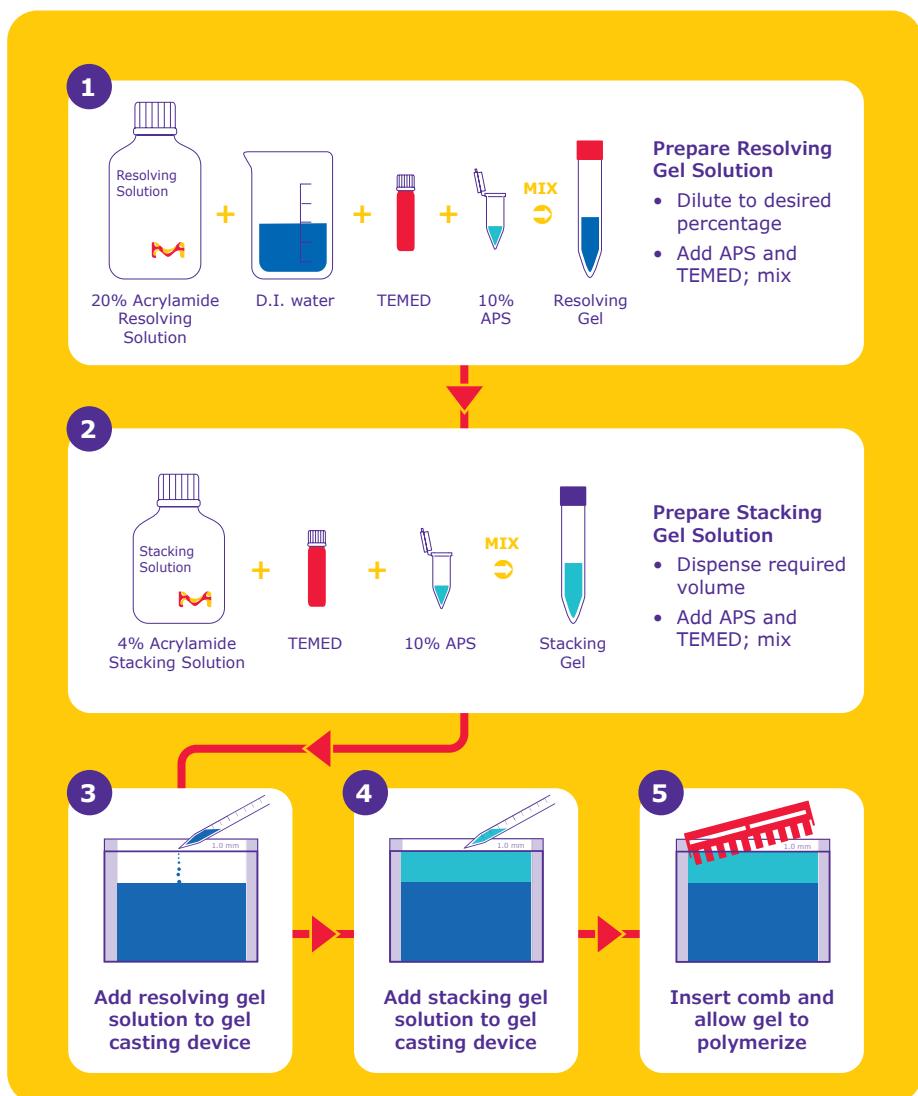

Longer cast gel shelf life: 3–4 weeks, with proper storage – neutral pH improves stability compared to tris-glycine gels

12% TurboMix™ Bis-Tris hand-cast gel loaded with *E. coli* lysate titrations (lanes 3–6), mPAGE® unstained protein standard (lanes 2 and 7), and PAGE® color protein standard (lane 1). Gel was run with MOPS buffer for 35 min at 200 V and stained with ReadyBlue™ Protein Gel Stain.

TurboMix™ Quick Cast Workflow

The TurboMix™ Quick Cast method offers a rapid, 5-step process for casting polyacrylamide gels.

Formulations to make your own buffers

mPAGE® Bis-Tris Precast Gels provide the perfect complement to the TurboMix™ handcast gel system when gradient gels are required for optimal analysis of proteins of different molecular weights. mPAGE® gels use the same sample and running buffers as TurboMix™ gels, providing excellent resolution and compatibility with common mini gel tanks.

Note: use either MOPS or MES running buffer. Do not use Tris-Glycine running buffer with TurboMix™ gels.

4X LDS Sample Buffer

Cat. No. MPSB-10ML or MPSB-250ML

Reagent	Amount
Tris-HCl	0.666 g
Tris-Base	0.682 g
Lithium Dodecyl Sulfate (LDS)	0.800 g
EDTA	0.006 g
Glycerol	4 g
Coomassie Brilliant Blue G250 (1% solution)	0.75 mL
Phenol Red (1% solution)	0.25 mL
Deionized water	to 10 mL

1X mPAGE® MOPS SDS Running Buffer

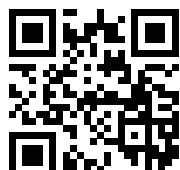

Cat. No. MPMOPS

Reagent	Amount
MOPS	10.46 g
Tris-Base	6.06 g
SDS	1.00 g
EDTA	0.30 g
Deionized water	to 1 L

1X mPAGE® MES SDS Running Buffer

Cat. No. MPMES

Reagent	Amount
MES	9.76 g
Tris-base	6.06 g
SDS	1.00 g
EDTA	0.30 g
Deionized water	to 1 L
